WHO WE ARE

Experience. Detail. Trust.

Bringing the strength of aluminium to contemporary architecture.

Founded by Süha Güvenç in Istanbul in 1986, Astor Yapı turns its aluminium manufacturing and installation experience into project-specific solutions.

We consider dimensions, use and architectural details together, defining the scope with you from drawings and production through to installation and handover.

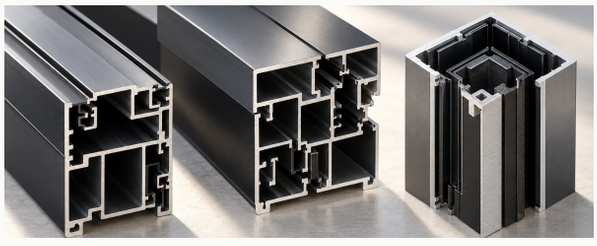
Spaces that welcome light.

Aluminium solutions that complement contemporary architecture.

For homes, offices and commercial spaces, we assess openings, connections and practical needs together.

- Project-specific dimensions
- Profile, glazing and hardware selection
- Details aligned with the architecture
- Scope defined in a written quotation



Images are AI-generated architectural illustrations.

Connecting inside and out.

The way a door or window opens shapes everyday use.

For doors, windows and sliding systems, we consider access, opening direction, glazing and finish requirements together.

- Door and window applications
- Sliding system solutions
- Hardware selected for the intended use
- Project-specific openings and joints

Strength in the connections.

In harmony with the building.

Let’s review your project for façade-integrated joinery, profile connections and bespoke architectural details.

Façade type, structural connections, glazing configuration and installation limits are defined through project drawings, technical review and a written quotation.

Turning ideas into aluminium.

For non-standard dimensions and bespoke architectural needs.

From terrace details to bespoke profile connections, let’s develop the solution your design requires.

- Review of drawings and dimensions
- Material and connection options
- Production planned around approved details

Across different living spaces.

Every space has different needs. Thoughtful details connect them.

Homes & villas

Daylight, access and architectural harmony.

Offices & retail

Partitions, doors and functional layouts.

Terraces & outdoors

Details tailored to outdoor living.

These illustrations communicate design ideas; they are not photographs of completed projects.

The first step: share your brief.

The following information helps us prepare a relevant quotation.

01 Project location

City, address and application area.

02 Dimensions & quantity

Approximate dimensions, total span and number of units.

03 Drawings & photographs

Existing plans, details or photographs of the site.

04 Target date

Your preferred manufacturing and installation schedule.

The technical system, materials and delivery scope are defined per project in a written quotation.
